## Sedan and Bath Chairs.

The sedan chair, so called from having been made at Sedan, in France, was introduced into England in the time of King Charles I. Often this chair was most ornate without and luxurious within, for an ancient poet speaks of one—

\*\*\* Covered with velvet red, And cloth of fine gold about your head. With damask white and antique blue Well diapered with lilies new.

Seated in their sedan chairs in all the glory of paint, powder and patches, the belles and ladies of fashion of the eighteenth century were carried from rout to rout by two stout lackeys in livery. As all people who love their Dickens are aware, these chairs were still in use in the days of the Pickwick club.

The origin of the bath chair is "wropt in mystery." We are told that it was "much used by the inhabitants of Bath," probably for the purpose of getting to and from the pump room. Nowadays the use of the bath chair is confined chiefly to invalids—London Mail.
